

Apple Certification & Training

Become Certified. Become Proficient. Become Creative.

Stand out from the crowd. Differentiate yourself and gain recognition for your technical expertise with Apple Certification. Apple offers comprehensive certification programs for Mac OS X, hardware, Xsan, iLife and iWork, and professional applications.

Apple Training and Certification

ADNET, in partnership with InstructUS Training Centers, offers comprehensive apple training that addresses a broad range of technical proficiencies, enabling IT and creative professionals, educators and service technicians to broaden their skills and obtain tangible proof of their expertise.

As businesses increasingly choose to run across multiple operating systems, including Microsoft Windows, Mac OS, and Linux, they need to bring their staff to a higher level of training and certifications across all platforms. In order to keep up with the ever-changing times of technology - ADNET will help ease that change with Apple certification and training.

5 Reasons to Be Apple Certified

1. **Raise your earning potential.** Studies show that certified professionals can earn more than their non-certified peers.
2. **Distinguish yourself from others in your industry.** Proven mastery of a technology helps you stand out from the crowd.
3. **Increase your marketability.** Hiring managers tend to favor candidates whose knowledge and skills are validated by certification.
4. **Advance more quickly in your career.** Take control of your career in a fast-paced, dynamic world. With shortages in many specialized fields, certification can give you control of your own path and help you progress more quickly through the ranks.
5. **Stay current and relevant in your field.** Maintaining current certification in your industry demonstrates initiative and helps you stay ahead of the curve.
